

Mastering Legacy System Support

Cost-Effective, Expert Support For McKesson Legacy System

Fact: The sunset of McKesson Horizon Clinical Infrastructure applications comes as hospitals' and health systems' IT departments are focused on meaningful use attestations and preparation for ICD-10 conversions.

Fact: At Parallon Technology Solutions, our expert McKesson support teams free up your in-house staff for critical projects while also providing more cost-effective tier 2 support.

With McKesson Horizon Clinical Infrastructure applications due to sunset, many hospitals and health systems are looking to move to new systems, often from a new vendor. This process can occupy in-house resources for up to two years. Parallon Technology Solutions McKesson-trained professionals can help.

Our team of consultants has an average of 15 years experience with McKesson systems, many supporting them in-house for hospitals or through a clinical background. When your clinicians call a Parallon Technology Solutions support team member, they can be assured they are working with a partner who knows McKesson and healthcare business in equal measures.

Advantages of Parallon Technology Solutions provides McKesson application support:

- **Extends your team:** It allows your in-house staff to focus on meaningful use, ICD-10 and the next system implementation to replace Horizon Clinicals.
- **Lowers cost:** PTS' remote support can cut the devoted, in-house resources in half, while providing cost-effective service and solutions.
- **Keeps system current:** Our support team can implement needed system changes during a conversion without disruptions to your staff or patient care.
- **Covers all support needs:** We support non-McKesson applications that connect to your McKesson platform. With PTS' scale, we have application experts on all the major systems.
- **Quick handoff:** We can implement full support in 30 days.
